bubble-tea is a tea-based drink, which successfully captured Asian, American and Australian markets. It is really catching on!

The basis of the drink are Tapioca Pearls, tea and milk blended with ice.

Tapioca is an innovative product of a gummy bear texture, which we place in a refreshing, milky tea creating a snack drink. Tapioca Pearls are sucked through a fat straw along with the drink and are a good source of iron, calcium and vitamin C. Most of all they taste great!
